EHI Export: CarePathways Reporting Form and Table Documentation

Last Updated: September 2024

Table of Contents

Overview

This documentation describes each CarePathways EHI tables as of September 2024 in the current released version. The documentation reflects the most current information at the time it was produced. The documentation is broken out by table. Each table contains a description and column names.

Accessing the data within these tables is accomplished via database access. Named users are supplied with access and can use the list of SQL queries below to pull out data related to one or all clients. This process can be completed at any time and does not require Netsmart assistance to complete.
